Curriculums to Equip Students with the 21st Century Skills

Our school-based junior secondary curriculum provides students with opportunities to learn in a boundless setting away from traditional classrooms. In addition, our 2-year Enrichment Course equips students with 21st Century Skills for life-long and life-wide learning. Cultivation and development on leadership, creativity, research skills and vision of the future are the main area implemented into the curriculum. To cater different career and life plans, there are 50+ subject combinations (including other languages) in our senior secondary curriculum. Our S.6 students achieved good results in HKDSE Examinations. In the past five years, over 96% of our graduates have continued their studies at tertiary level, both locally and internationally.

Authentic Voyage of Language Acquisition

With a view to bringing students to an authentic language learning environment and promoting a rich reading and writing atmosphere, native-speaking English and Putonghua teachers are deployed. In particular, we have 4 English teachers, including native-speaking English teachers, in oral lessons splitting into groups to ensure every student participates actively. Every year, we provide ample opportunities for students to practise authentic English through participation in English drama, education tours and external competitions.

School Mission

We aim to help students achieve personal excellence through nurturing in them a set of positive values and developing their social and learning attitudes as well as their professional competence which are conducive to life-long learning. We work for the betterment of our society in our provision of well-educated student graduates who are also open-minded, loyal and dedicated citizens.

“We strive to develop students’ full potentials and unique talents.”

STREAM Education

Our school has paid concerted effort in implementing interdisciplinary STREAM education. STREAM is an acronym for Science, Technology, Reading & wRiting, Engineering & Robotics, Art & Design and Mathematics. Our STREAM education cultivates grounds to promote popular and citizen science.

With synergized efforts of teachers and students, our school has gained over 950 major awards in local, national and international competitions in the past 10 years. Our school attained “School of

Distinction Award” (全國十佳科技教育創新學校) in the China Adolescents Science & Technology Innovation Contest. We have also attained the Outstanding Organization Award (優秀組織獎) in the Hong Kong Youth Science & Technology Invention Competition ten years in a row.

Global Awareness

Global awareness is of immense importance in the 21st century. In our Global Awareness Programme (GAP), students become engaging in communication with people from a wide range of different cultures and traditions. Global issues such as sustainable development and rising planetary challenges are parts of our GAP.

Our School builds up an excellent international network through International Mentorship Programme (IMP) Advisors from all over the world. With their support, we organized various thematic education tours, seminars and international cultural exchange programmes.

Scholarships & Fee Remission Scheme

A comprehensive school fee remission scheme provides financial support to needy students, including those from families receiving the Comprehensive Social Security Assistance (CSSA). Eligible students will receive fee remission at different rates depending on their needs.

Students will also be offered scholarships for excellent academic or non-academic results and conduct.

S.1 Entrance Scholarships

Scholarships are offered to Primary Six students with excellent academic results and conduct. The scholarship awards can cover up to 100% of school fee for all six years of study.

Creativity, Performing and Visual Arts

Arts education is one of the key areas to arouse students’ creativity. Our School not only develops students’ appreciation on traditional art ranging from painting, Chinese Calligraphy to ceramics, but also on digital arts by applying Virtual Reality (VR) and digital drawing to create 2D and 3D artworks. In performing arts, we have Choir, Chinese Orchestra, Orchestra, ensembles, drama and dance teams.

Smart Healthy School

Our school aims at fostering moral values and cultivating good habits in students. We stress the importance of physical and mental health of students. Students are taught to counter negative influences and demonstrate resilience when facing challenges. Through promoting a balanced diet and physical exercises, we help students develop healthy routines.

Our S.6 students achieved very good results in the HKDSE Examination 2021. 80.0% (cf. territory 36.2%) of our students have attained the university’s admission requirement, with C. H. Cheung attained Five 5** (Math, M2, Chem, ICT, Phy) and One 5* (Eng) while W. M. Chung attained Three 5** (Chin, Eng, Econ) and Two 5* (LS, Geog). 90.8% of our graduates have received Joint University Programmes Admissions System (JUPAS) offers.
